WORK EXPERIENCE

Ire-Loni International Ltd

October 2015- February 2017

IT-Specialist

Lagos, Nigeria

- Served as a field agent representing the company in inspecting high value properties.
- Digital data and information are efficiently managed using Excel, Word, and PowerPoint resulting in a 65% reduction in paperwork and a 50% increase in productivity
- Actively involved in multi-million-naira real estate transactions with clients in the real estate development sector
- Played a key role in enhancing company operations and client relationships through effective property management.

PROJECTS

Brewery App

- Developed a mobile responsive, web application focused on showing breweries details including company number and location of breweries in USA.
- Breweries data from open brewery API, using Axios to handle requests.
- UI/UX designed using TailwindCSS, Vue3, and Vite.
- Hosted on Vercel - <https://breweries-nine.vercel.app/>

Movie/Series Abstract page

- Developed a mobile-responsive web application that allows users to search for movies and series, providing detailed information, plots and award information.
- Used React.js, CSS3, Bootstrap and Node.js to create user interfaces for simple and engaging experience.
- Used open-movie RESTful API to efficiently handle background processing.
- Maintained a GitHub repository for the project, accessible here: <https://github.com/Becouif/movie-series-overview-reactjs.git>
- The web application is available and can be accessed here: <https://movie-series-overview.vercel.app/>

Monster Game

- Developed a web-based game using Vue.js and the composition API, with the backend powered by Node.js.
- The front end was designed using HTML5 and CSS framework (Tailwind CSS) to ensure a rich user experience.
- The source code for the game is available on GitHub: <https://github.com/Becouif/web-monster-game.git>
- A live version of the game is available at <https://monstergame-gamma.vercel.app/>
